

Fundamentals and Applications of Immunoabsorption

Priv.-Doz. Dr. Norbert Braun, Klinik für Innere Medizin, MediClin Müritz-Klinikum

UNI-MED Science, 2., neubearb. Auflage 2013, 104 pp, 22 illustrations, Hardcover, ISBN 978-3-8374-1432-5 (Germany) / ISBN 978-1-84815-208-3 (Rest of the world), Euro 29,80

ePDF-version: ISBN 978-3-8374-5432-1, Euro 29,80

This textbook provides a comprehensive summary of current adsorption techniques applicable in humans. Immunoabsorption may be considered for a variety of indications, including rare nephrological conditions, dilated cardiomyopathy, autoimmune bullous diseases and autoimmune encephalitis. The main focus, however, has been laid on transplantation. The reader will find protocols for ABO-incompatible transplantation as well as for antibody-mediated rejection in heart, lung and kidney transplantation.
