

Iron Deficiency and Anaemia in Women in the Gynaecological and Obstetrical Practice (with Case Reports)

Prof. Dr. Christian Breymann, Clinic of Obstetrics, University Hospital Zürich

UNI-MED Science, 2nd edition 2020, 64 pp, 30 illustrations, Hardcover, ISBN 978-3-8374-2417-1, Euro 19,80

ePDF-version: ISBN 978-3-8374-6417-7, Euro 19,80

Iron deficiency states without anaemia are frequently found in countries with normal nutrition, and countries with chronic malnutrition have a high prevalence of people with iron deficiency anaemia. Anaemia and iron deficiency are among the top causes of morbidity and mortality throughout the world. Successful iron therapy depends on the correct diagnosis as well as the choice of effective iron preparations.

This updated edition deals with the diagnosis and treatment of iron deficiency states in females considering the current use of iron preparations and presents numerous obstetric and gynaecological case reports encountered in daily practice.
