

# Immune Thrombocytopenia (ITP)

Thomas Kühne, Division of Oncology/Haematology, University Children's Hospital, Basel

UNI-MED Science, 3rd edition 2022, 204 pp, 37 illustrations, Hardcover, ISBN 978-3-8374-1624-4, Euro 44,80

The material of ITP became more and more complex and substantial in recent years. The current edition was updated in a difficult time reflected by the COVID-19 pandemic with many obstacles and adversities. Therefore all authors worked hard on this edition and contributed to the successful completion of this book. It would be a desirable conclusion if this new edition would contribute to optimal ITP patient care and management.
